PROFESSIONAL SUMMARY

Full-stack web developer with hands-on experience building clean, scalable, and user-friendly web applications. Strong expertise in React, Next.js, Django, and MongoDB, with a solid understanding of both frontend and backend development. Passionate about solving real-world problems through code and delivering modern digital experiences. Comfortable working with APIs, authentication systems, databases, and version control using Git & GitHub.

TECHNICAL SKILLS

Frontend Development

- React.js
- Next.js
- JavaScript (ES6+)
- HTML5 & CSS3
- Responsive UI Design

Backend Development

- Node.js (Next.js backend)
- Django & Django REST Framework

- Authentication (JWT, NextAuth)

Databases

- MongoDB
- SQL

DevOps and Automation

Git

Github

Docker

CI/CD[Jenkins]

PROJECTS

1. AI-Based Maize Yield Prediction System

Description:

Developed an AI-powered system that predicts maize crop yield based on agricultural and environmental data. The system analyzes factors such as soil conditions, rainfall patterns, and farming practices to provide farmers with yield estimates. It helps farmers make better planting and resource allocation decisions to improve productivity.

Technologies Used:

- Machine Learning

- Python
- Data Analysis
- Agricultural Dataset Processing

Key Features:

- Predicts maize yield using historical and environmental data
- Supports decision-making for farmers
- Data-driven agricultural insights

2. Shop Management System Dashboard

Description:

Designed and developed a web-based shop management system that allows users to manage products, track sales, and monitor business performance through a dashboard. The system records transactions and ensures that users can view **only their own sales data**, improving security and personalization.

Technologies Used:

- Next.js
- MongoDB
- JavaScript
- REST API

Key Features:

- Product inventory management
- Sales recording and tracking
- User-specific sales dashboard
- Backend API for sales processing

Pips Hunter – Trading Journal & Forex Education Platform

Description:

Developed a web-based platform that helps traders track, analyze, and improve their trading performance while also learning trading strategies. The system allows users to record trades, review performance statistics, and access educational resources related to forex trading and risk management.

Technologies Used:

- Next.js
- JavaScript / TypeScript
- Database (MongoDB or similar)
- HTML & CSS

Key Features:

- Trade journaling system for recording and reviewing trades
- Performance tracking and analytics for trading history
- Educational content for forex trading strategies
- User authentication and personalized dashboards
- Clean and responsive user interface

Impact / Purpose:

- Helps traders identify patterns in their trading behavior
- Encourages disciplined trading through data tracking
- Combines trading education with performance analysis

WORK EXPERIENCE**Backend Web Developer & IT Specialist**

Murang'a County Government | Murang'a, Kenya

April 2025 – July 2025 [3 months]

Responsibilities:

- Developed and maintained backend components for internal web applications and digital systems.
- Assisted in designing and implementing APIs to support web-based services and data exchange.
- Managed databases and ensured secure storage and retrieval of system data.
- Provided IT technical support to staff, including troubleshooting hardware, software, and network issues.
- Assisted in maintaining computer systems, servers, and organizational IT infrastructure.
- Supported system updates, testing, and debugging to ensure reliable application performance.

IT Specialist & Digital Support Engineer

Hela Intimates Limited | Kajiado, Kenya
July 2025 – September 2025 [3 months]

Responsibilities:

- Provided technical support for company digital systems, ensuring smooth daily IT operations.
- Assisted employees in troubleshooting hardware, software, and network-related problems.
- Supported the implementation and maintenance of digital tools used in business operations.
- Helped maintain system security, user access controls, and software updates.
- Assisted in managing company databases and digital records.
- Worked with technical teams to resolve system issues and improve operational efficiency.

EDUCATION

Murang'a University of Technology – Murang'a County, Kenya
Bachelor of Science in Software Engineering
2022 – 2026

LANGUAGES

- English – Fluent
- Swahili – Fluent

INTERESTS

- Exploring new web technologies
- Building side projects
